

The Aging in Place Services team has been busy this summer with many interesting projects. Take a few moments and find out what we have been up to over the past few months.

### **We created an accessible home for Tom and Anne M.**

Tom, who was living with Parkinson's disease, wanted to get back some of his independence, and access to more of his normal world. In addition, this project was important to give his wife Anne some respite from worry about his safety and it provided space for him to maneuver in their home. This video shows how we adapted their home to better fit their needs.

### **We've been on the move! Hear what some of our clients have to say about that:**

"I was blown away by the sensitivity and professional standards of Sara Beth and her team. I had to move my mother from an apartment to a studio with much less space. Sara Beth ascertained which pieces of furniture were the most important to mom and where everything would fit most practically. My mother loves her new space. The move was seamless for me. They are true, caring pros."

#### **Nan**

"I want to thank Sara Beth and the APS team for everything you did for my Mom in getting things settled in her new apartment. We simply love the new location and she is so very happy. That is so comforting to me. I would have never gotten this done, and would still be trying to dig out of the boxes, pictures, etc. To move my mother was the best decision I ever made,

as well as hiring Aging in Place Services. I just wanted you to know how much this was a 'God Send' to have your company handle this move."

#### **Mylinda**

"Sara Beth and Aging in Place Services have moved my wife and I three times and we would never use anyone else. We spent almost a year downsizing and leaving our home of 28 years, with them cheering us on and helping us make it thru the process. When we needed to move again they were there and ready to help. Each time they have shown that they care about us and can take care of everything we need. They are our team!"

#### **Stan**

---

"The APS team has made several new friendships over the last few months. We look forward to many more opportunities to help our clients transition into new spaces in the future." said Sara Beth Warne, APS founder.
