

Celebrating Independence!

We all want to be able to live independently for as long as we are able, and in our homes for as long as possible. Aging in Place Transition Services (APS) helps our clients make this a reality. Recently the APS Team has worked on several projects that demonstrate this.

Sara Beth and the APS Team assisted Suzie, who had lived in her home 46 years, with downsizing and moving. The project was like a puzzle with many moving parts and in the end Susie was very pleased with how it all came together. She was working with Kathleen Evers, a Nashville interior designer and friend of the family, who was overseeing renovations to her new condo and coordinating her furniture plan. The APS Team has worked with Kathleen on other projects in the past and the teamwork has always led to success.

[Watch this video](#) to find out how the entire process worked from deciding what belongings would be moved, what be shipped to children, what would be sent to consignment shops and what would be donated to charity.

Her daughter-in-law, real estate agent Trish Woolwine, had this to say: "Moving can be daunting. Sara Beth and her team are amazing! As a real estate agent, I have used the APS team to assist my clients with downsizing and moving. Recently, APS helped me and my family pack and move into my husband's family home. Plus, they managed my mother-in-law's downsizing and move into her new apartment." [Watch the video to learn more.](#)

We love repeat clients at APS. We're on your move! Recently we were asked by Sallie's brother to help move her to a new community. Having downsized and moved Sallie several years ago, she was familiar with our team. Sallie said that we do a good job in getting things into their new places. But most of all she appreciates our patience as she processes and makes decisions. Sallie said the APS team was very supportive when things got emotional and yet we firmly continued to push her forward. Her brother, Tommy, was also pleased, as you can see from the testimonial he wrote for our [customer comments page](#) on our website. You can also see a slideshow of photos from the project on our Facebook page.
